Special Interests:

Pediatric Endocrinology
General Pediatrics

I Dr Ayesha Ahmad have been working as a faculty in a government medical college in Uttar Pradesh. Having developed a keen interest in Pediatric endocrinology, I applied for ESPE sponsored clinical fellowship at Royal Victoria Infirmary, Newcastle upon Tyne UK. Upon completion, I started a specialty endocrine OPD in my department which caters to a vast population especially from economically weaker section. Me with my team of post graduate residents, aspire to help children with specific endocrine disorders. And to develop pediatric endocrinology as a special division in the department of Pediatrics.

We have been organizing CMEs and awareness programs to spread the awareness about endocrine disorders and recently I have been granted a DBT project for the establishment of 'Nidan Kendra', my dream project for screening of newborns for congenital hypothyroidism and CAH.
